

■ Sales & Customer Dashboard

Project Requirements Document | Tableau

■ Project Overview

Tool	Tableau Desktop
Dashboards	2 (Interconnected — Sales & Customer)
Data Format	CSV Files (Customers, Location, Orders, Products)
Target Users	Sales Managers & Marketing Teams
Year	2023 vs 2022 (Year-over-Year Comparison)

■ Project Workflow

Phase	Steps
Analyse Requirements	Collect Requirements → Choose Right Charts → Draw Mockups → Choose Colors
Build Data Source	Connect Data → Create Data Model → Rename Fields/Tables → Check Data Types → Understand Data
Building Charts	Create Calculated Fields & Test → Build Chart → Format: Remove Lines & Grids, Clean Axis & Headers, Coloring, Tooltip
Building Dashboard	Draw Mockups for Containers → Build Container Structure → Put all Charts together → Format → Add Filters & Dynamic → Add Icons

Dashboard 1 — Sales Dashboard

Dashboard Purpose

To present an overview of the sales metrics and trends in order to analyze **year-over-year sales performance** and understand sales trends.

Key Requirements

■ KPI Overview

- Display a summary of total sales, profits and quantity for the current year and the previous year.

■ Sales Trends

- Present the data for each KPI on a monthly basis for both the current year and the previous year.
- Identify months with highest and lowest sales and make them easy to recognize.

■■ Product Subcategory Comparison

- Compare sales performance by different product subcategories for the current year and the previous year.
- Include a comparison of sales with profit.

■ Weekly Trends for Sales & Profit

- Present weekly sales and profit data for the current year.
- Display the average weekly values.
- Highlight weeks that are above and below the average to draw attention to sales & profit performance.

Charts Used

Chart Type	Purpose
BANs (Big Ass Numbers)	KPI Summary — Total Sales, Profit, Quantity
Sparkline	Monthly KPI trends (current vs previous year)
Bar-in-Bar Chart	Product subcategory comparison (Sales vs Profit)
Line Chart	Weekly Sales & Profit trends with avg reference line

Dashboard 2 — Customer Dashboard

Dashboard Purpose

To provide an overview of customer data, trends and behaviors — helping marketing teams and management **understand customer segments** and improve customer satisfaction.

Key Requirements

■ KPI Overview

- Display a summary of total number of customers, total sales per customer and total number of orders for the current year and the previous year.

■ Customer Trends

- Present the data for each KPI on a monthly basis for both the current year and the previous year.
- Identify months with highest and lowest sales and make them easy to recognize.

■■ Customer Distribution by Number of Orders

- Represent the distribution of customers based on the number of orders they have placed.

- Provide insights into customer behavior, loyalty and engagement.

■ **Top 10 Customers by Profit**

- Present the top 10 customers who have generated the highest profits for the company.
- Show additional information: Rank, Number of Orders, Current Sales, Current Profit and Last Order Date.

Charts Used

Chart Type	Purpose
Sparkline	Monthly customer KPI trends (current vs previous year)
Bar Chart	Customer distribution by number of orders placed
Data Table	Top 10 customers by profit with rank, sales & last order date

■ **Datasets Used**

File	Description
Customers.csv	Customer names, IDs and segment details
Location.csv	Region, state and country data
Orders.csv	Order transactions, dates, sales and profit
Products.csv	Product categories and subcategories

■ Both dashboards are fully interconnected. Filters and selections applied on one dashboard automatically reflect on the other, enabling seamless and dynamic analysis.
